AI Use Disclosure

Why this survey? This disclosure form aims to *help us understand and reduce any potential risks* related to the use of AI tools in this course.

Please complete the survey **by yourself** and be **truthful**. *Using AI tools will not negatively affect your marks for the assignment/lab/etc.*

What do we mean by AI tools in this survey?

AI content generators refer to any tools that create any type of content, including (but not limited to):

- ChatGPT and all other large-scale language models;
- Stable Diffusion and other AI-based Image Generators;
- Code extensions for IDEs;
- Other tools that are capable of generating text, image, codes, or any other content for the course work. BUT, Grammarly and other grammar checkers are NOT included.

For more information on our policy, please refer to: https://parsa-rajabi.github.io/cmpt-276/#/ai-policy

1. First Name *

   Jin

2. Last Name *

   Song

3. SFU Student ID *

301470175

4. Which assignment/lab/project submission is this AI use disclosure for? *

    Project Milestone #1   ⌄

5. How do you feel about using AI content generators in relation to your person standards of academic integrity for this submission? *

	Completely Acceptable	Somewhat Acceptable	Neutral	Somewhat Unacceptable	Completely Unacceptable
In my personal standard of academic integrity, using AI content generators for this submission is...	◉	○	○	○	○

6. Please explain your rating above regarding academic integrity of AI use for this submission. Why? (Write in 2-3 sentences) *

    AI is a powerful resource for project completion; when we are in the workforce we will be expected to use all the resources at our disposal. Also, our group project is about AI education, so it would be contradictory if I thought AI use for this assignment was unacceptable.

7. How did using AI content generators impact **your learning** for this submission? *

	Greatly benefited my learning	Somewhat benefited my learning	Had no impact on my learning	Somewhat hindered my learning	Greatly hindered my learning	I did not use AI for this submission
Using AI content generators for this submission...	◉	○	○	○	○	○

8. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences, input N/A if you have not used any) *

Though AI idea generation wasn't used in this submission, it was really helpful to have something to double check my ideas with. I also used AI to convert my ideas and presentation script notes into a more formal report format. Then, I made improvements upon the output.

9. For this submission, how would you rate the relative contribution made by your versus AI? *

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Fair
This submission is...	○	◉	○	○	○	○

10. List all the **AI tools** AND the **specific prompts** you used for this submission (input N/A if you have not used any) *

I used ChatGPT with the following prompts:

pls check for grammar mistakes:

Probloom's technology stack is designed with user experience and development efficiency in mind. We plan to use React.js for the front end because it's great for building fast and interactive user interfaces, making it perfect for our single-page application. For the AI component, we've chosen the OpenAI API because it is a cutting-edge technology for understanding and generating text, which is key for creating practice problems.

Python is in our tech stack as it is widely used in the machine learning communities, and it will be integrated for its strong role in this field. To manage PDF inputs and outputs, we use PDF.js. PDF.js will be responsible for scanning the input PDF into a readable text script that will be used as our input to our OpenAI API. PDF.js will also be used for taking the text output from the OpenAI API and placing it into a PDF that will be downloadable for our user. Our server-side operations rely on Node.js, which allows us to use JavaScript across our entire application, streamlining development. Lastly, we're hosting our app on AWS, which is not only reliable but also offers a free tier, making it cost-effective for our initial launch.

generate 5 questions about sdlc pls

define active recall in studying

pls give example of web app tech stack and explain why

for my web app im just react.js for frontend and node.js (pdf js api) and python (openai api) for backend. pls give reasons explaiing why

probloom is an ai powered web app that generates practice problems based on the user's inputs
the user has the option of entering plain text or pdf input
similarity, our app will generate output as plaintext and give the user option to download as pdf
ai will also generate solutions for the user to check their answers with

pls revise this into formal writing for a project pitch report

Tech stack & api
React.js: widely used js library, well equipped for single-page applications and speedy ui
Openai api for natural language processing, generation of practice problems
Python: will be integrated via python bc python is widely used in machine learning development.
Pdf.js: to handle pdf operations
Node.js: js runtime environment for application of our apis
Aws: free tier available lol

revise this into formal writing for a project pitch report pls

11. How confident were you in AI's responses that you received? *

   ⦾ Confident

○ Somewhat confident

○ Neutral

○ Somewhat not confident

○ Not confident

○ I did not use AI for this submission

12. How did you ensure the answer you received from the AI tool was correct? (input N/A if you have not used any) *

I double checked with Google/looked up other sources when I wanted answers. For writing components, I just used my own critical thinking and language comprehension.

13. Did you at any point abandon using AI tools and seek other resources? Explain your answer.   *

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

No, I did not abandon the AI tool.

14. For each of the following items, how would you rate the relative contribution made by you versus AI? *

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
Writing - Proofreading: To revise written work for grammar,	○	◉	○	○	○	○

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
typos, style, and other related items						
Writing - Text Completion: To complete sentences, paragraphs or even entire documents	○	○	◉	○	○	○
Writing - Text Ideation: To generate new ideas, concepts; and examples for writing submissions	◉	○	○	○	○	○
Text analysis: To make sense of text and generate insight as to what it means	◉	○	○	○	○	○
Summary: To quickly understand large amount of text by extracting important information	◉	○	○	○	○	○

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
Q&A + Research: To get answers from questions and find relevant information	○	◉	○	○	○	○
Illustration /Sketching: To create visual representations of concepts and ideas such as diagrams, charts, illustrations	○	○	○	○	○	◉
Coding - Write: To generate code by AI for software implementation	○	○	○	○	○	◉
Coding - Test: To generate code tests by AI for software implementation	○	○	○	○	○	◉
Coding - debug: To identify	○	○	○	○	○	◉

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
issues with existing code for software implementation						
Coding - explanation: To understand what a code snippet does for software implementation	○	○	○	○	○	◉
Other: to help any other aspects of the submission not listed above	○	○	○	○	○	◉

15. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

I did not rely on AI for research purposes; I looked at documentation I found on Google. For that section, AI was a supplement for quick confirmation. For writing components, I already had all my ideas planned out (ie. written out in a script notes format for our project presentation) so I used AI to convert that into a formal report format before making edits/improvements upon that.

16. Please leave any further comments above use of AI tools for this submission / CMPT 276

:D
